String Rotation

+ Problem Description

Rotate a given String in specified direction by specified magnitude.

After each rotation make a note of first character of the rotated String, After all rotation are performed the accumulated first character as noted previously will form another string, say **FIRSTCHARSTRING**.

Check If **FIRSTCHARSTRING** is an Anagram of any substring of the Original string.

If yes print "YES" otherwise "NO".

+ Constraints

$1 \leq \text{Length of original string} \leq 30$

$1 \leq q \leq 10$

+ Input Format

The first line contains the original string s. The second line contains a single integer q. The ith of the next q lines contains character d[i] denoting direction and integer r[i] denoting the magnitude.

+ Output

YES or NO

+ Test Case

+ Explanation

Example 1

Input

carrace 3 L 2 R 2 L 3

Output

NO

Explanation After applying all the rotations the **FIRSTCHARSTRING** string will be "rcr" which is not anagram of any sub string of original string "carrace".

Upload Solution [Question : A]

☐ I, **chukka bharath** confirm that the answer submitted is my own.
